Answer each question below, considering conservation practices planned to receive EQIP financial assistance. Only one tract per application. All applicants must sign a CCC-1200 in addition to this form to be considered for EQIP funding.

NRCS National Conservation Priorities

1	Will the planned conservation treatments in this EQIP application result in reductions of Nonpoint source pollutions such as nutrients, sediment, or pesticides and excess salinity in impaired watersheds consistent with TMDL's, where available, as well as the reduction of groundwater contamination and the conservation of ground and surface water resources?	Yes	No
2	Will the planned conservation treatments in this EQIP application result in reduction of emissions, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards?	Yes	No
3	Will the planned conservation treatments in this EQIP application result in reduction in soil erosion and sedimentation from unacceptable high levels on agricultural land?	Yes	No
4	Will the planned conservation treatments in this EQIP application result in the promotion of at-risk species habitat recovery?	Yes	No

Missouri State Issues

5	Offered acres are in the watershed of a public drinking water supply reservoir or in a watershed of a 303d list stream with at least one EQIP planned practice that addresses the water quality concern in the watershed area identified.	Yes	No
6	Planned EQIP practice(s) include installing buffers on perennial or intermittent streams, wetlands, sinkholes, or permanent waterbodies and/or limiting or excluding livestock access to streams.	Yes	No
7	Application includes a resource concern(s) subject to Local, County, State, or Federal Regulation.	Yes	No
8	EQIP planned practice(s) address basic habit requirements of bobwhite quail on the offered acres.	Yes	No
9	EQIP planned practice(s) benefit a federal threatened or endangered species or a state rare species.	Yes	No
10	EQIP planned practice(s) include planned improvements to an existing animal waste management system.	Yes	No
11	EQIP planned practice(s) on offered cropland acres include a conservation practice(s) that will reduce sheet and/or rill soil erosion from the existing condition or treated to address air quality (for example, residue management, crop rotation, cover crop, and/or buffer practices).	Yes	No
12	Application includes EQIP planned practice(s) on currently irrigated cropland that will improve Irrigation Water Management efficiencies.	Yes	No
13	Application includes EQIP planned practice(s) that will improve grazing efficiency through a prescribed grazing system.	Yes	No
14	Application includes planned forest stand improvement (thinning) on woodland stands needing treatment and/or planned treatment of eroding areas on forest land (harvest trails, log landing areas, gullies, etc.).	Yes	No
15	Planned EQIP cropland practices include Nutrient Management.	Yes	No

Local Issues

16	Is a Prescribed Grazing system with 8 or more paddocks included in this EQIP application?	Yes	No
17	Are 51% or more of the offered acres within the Lower Marais des Cygnes River AgNPS SALT Area?	Yes	No
18	Will planned EQIP practices include one of the following on all cropland fields offered: Field Borders, Filter Strips, Residue Management No-Till/Strip Till and/or Grassed Waterways?	Yes	No
19	Planned EQIP practices focus on meeting the basic requirements of bob white quail habitat management on all offered acres as follows: Cropland: 1) 30 ft. field border of native grass/forbs mix with adjacent covey headquarters or edge feathering. 2) Complete eradication of fescue and/or brome and 3) Prescribed burning or light disking of field borders once every 5 years. Grass Land: 1) Livestock exclusion. 2) Create 30 ft. field border of native grass/forbs mix with adjacent covey headquarters or edge feathering by livestock exclusion. 3) Complete eradication of fescue and/or brome and 4) Prescribed Burning or light disking of field borders once every 5 years.	Yes	No
